For problem-solving with both technology and business

Arima Management Design is a management consulting company that
strives to solve modern complex management issues. With over
20 years of experience in the IoT/Embedded industry,
Arima Management Design excels at solving
those issues and contributing to future designs of companies and society.

President's Message

We have established Arima Management Design for the purpose of supporting corporate management/business development, activating the IT industry, where we have been conducting business for a number of years, and contributing to society by leveraging our professional knowledge in which we have acquired through our experience of corporate management and a social network that we have built up through industry foundation activities.

Japan has many social issues that are being worked on, such as optimizing the energy supply and improving the labor productivity of an aging society. We strongly believe that IoT/Embedded technology should play a bigger role in society in order to solve these issues.

Arima Management Design works on dealing with complex and cross-functional issues, such as new opportunities for business development combining technology with management, and innovation withclose collaboration between companies, industries, government and academia. Our goal is to work along with our customers to pave the way to a successful future for companies, industries, and society.

We highly appreciate your further guidance and encouragement.

Hitoshi Arima

Arima has more than 30 years of experience in the IT industry, starting his professional career from an embedded engineer who was involved in developing factory automation robots and embedded operating systems, and then moved his career to Silicon-Valley based companies as a manager of engineering and business development. Finally, as president, he has succeeded in launching three start-up companies in Japan, SDS, MontaVista Software, and dSPACE. Now he is an owner/president of Arima Management Design as well as a visiting professor at Nagasaki Institute of Applied Science and Kyushu Institute of Technology. He also contributes to social activities in industrial associations such as Systems Engineering Research Association, Skill Management Association and Association for the Promotion of Electric Vehicles.
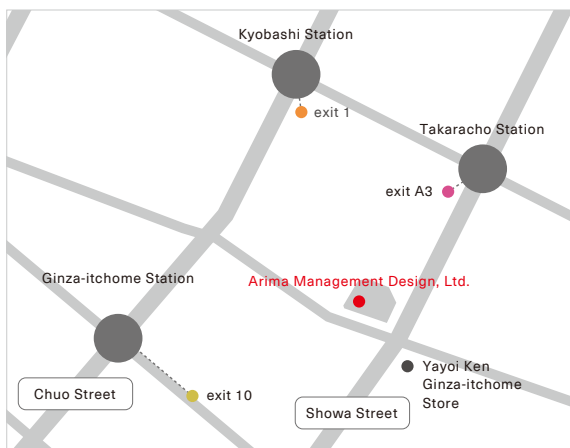

Hitoshi Arima
President
